

WITH ANTIOXIDANTS BIOFLAVONOIDS PHYTONUTRIENTS AND MINERALS

ARE YOU TOXIC?

We live in an increasingly toxic world. Through our food, medicine and environment, we are exposed to a cocktail of harmful chemicals on a daily basis.

Over time, this chemical body burden can overload our natural elimination methods and may contribute to excess weight, poor energy levels and focus, and generally impact overall health.

TODAY'S SPECIAL: TOXIC SOUP

The toxic storm we face in our modern world is blowing from all directions. Here are some common toxins that we can encounter in our environment:

Pesticides and

Heavy metals

Cosmetics and

Household

cleaners

toiletries

fertilizers

Toxic waste and pollution

Water treatment and flouridation

Radioactive waste and fallout

Genetically modified organisms

Prescription and OTC drugs

GMO

Fast food, additives and preservatives

Flame retardants

More than 1,000 new synthetic chemicals are being invented and introduced into the marketplace every year

The types and amounts of harmful substances

that are currently present in a person's body

Bisphenol A (BPA) is found in 9 out of 10 Americans

BODY BURDEN

Over 200 toxic chemicals are found in the umbilical cord blood from the average U.S. newborn

That new car or new couch smell is really the evaporation of volatile chemicals such as formaldehyde

Non-stick cookware gives off a toxic gas that causes lung damage and cancer

European governments have banned 1,200 more cosmetic chemicals than the U.S.

The facts on this page are from the alarming exposé The Hundred Year Lie by Randall Fitzgerald

YOUR BODY IS A DETOXING MIRACLE

Considering the toxic tornado swirling around us every day, the human body is incredibly proficient at detecting and dealing with foreign, harmful

substances that invade our system through our environment and diet.

But our bodies are becoming overloaded by our toxic surroundings, our consumer products, our demanding lifestyle, and our poor nutrition.

The need to cleanse internally is increasing in today's chemical-age. Our bodies' natural detoxification and elimination systems have not caught up with the invention, production and use of over 100,000 man-made chemicals—which has all happened in the last century.

EVERYBODY IS TOXIC

The question is no longer whether or not our body contains harmful chemicals and other impurities—the question is *how many*? And what kinds of adverse effects are they causing inside our body?

Scientific research continues to discover the negative impact on our health that results from this heavy exposure to our toxic world. Our bodies are overloaded. Our food is undernourished. And our fastpaced lifestyle leaves us stressed and fatigued.

Not only are these chemicals being linked to cancer, but also to autoimmune disorders, reproductive and fertility issues, an array of diseases. The most recent link—obesity.

TOXICITY & FAT: THE MISSING LINK?

The emerging studies of *obesogens* are finding correlations between our exposure to environmental impurities and excess fat storage.

It turns out we don't *just* store fat for energy. Your body uses excess adipose tissue as storage for chemicals and toxins when its natural elimination methods become overloaded. This protection mechanism keeps these harmful compounds away from our vital organs and tissue where they cause more damage. In other words, the higher our chemical body burden the more fat we will store.

A NEW APPROACH TO ANCIENT SCIENCE

BSAFE is an immune-boosting army of nutrients brought together to provide the body with antioxidants, phytonutrients, bioflavanoids, minerals and even a healthy dose of Vitamin B-12.

HEALTHY, SUSTAINABLE FAT LOSS

+ INCREASE IN ENERGY AND FOCUS

Learn more about the ingredients of BSAFE on the next page

Unlike a colon cleanse or laxative product, **B**SAFE is a potent—but gentle—formula that can be taken daily. This synergistic blend of natural compounds will help boost your body's natural immune and detoxification systems and leave you feeling healthy and energized!

NUTRITIONAL CELLULAR CLEANSING

TRADITIONAL, FAD AND YO-YO DIETING

Through exercise, caloric restriction and/or fasting, weight is lost. Along with a likely nutritional deficiency, the chemical body burden increases with less fat to protect from impurities.

RESTRICTIVE DIETING

When the diet ends, the body senses a heavier chemical body burden because there is less protection. Excess fat is regained to safely handle the chemical body burden that still exists.

REBOUND WEIGHT GAIN

As the body begins to eliminate more impurities, the chemical body burden is reduced and there is less need for the production and storage of excess fat resulting in healthy weight loss.

NATURAL WEIGHT LOSS

As the body no longer carries a heavy chemical body burden, there is less need for excess fat storage and production. This allows for healthy, sustainable weight maintenance.

MAINTENANCE

BSAFE A CLOSER LOOK

THE MOST IMPORTANT INGREDIENT-AND IT'S NOT IN BSAFE

Our tap water has an average of over 200 toxic chemicals, heavy metals and pollutants, most notably flouride. Nothing is more vital to your good health than drinking enough purified water. You should be drinking half your body weight in ounces of purified water each day.

+ IMMUNE BOOSTING SUPPORT

When we have a high body burden, our immune system works overtime. BSAFE not only contains ingredients that support healthy immune function, but the elimination of harmful impurities will free our immune system to focus on pathogens and bacteria.

+ DAILY NUTRITIONAL CLEANSE

With heavy metal chelators such as coriander and chlorella, and natural detoxifiers like milk thistle and turmeric, BSAFE is a mild, daily supplement of nutrients and minerals that support the natural elimination of harmful chemicals and other impurities from the body.

TIME FOR CHANGE

We brush our teeth so they don't decay and fallout. We change the oil in our cars so they don't break down. We clean the filters in our swimming pools to keep the water clear of algae and bacteria. We change the filter in our air conditioners to keep dust and particles from the air in our homes. We clean and maintain everything except our most important asset—our internal body.

DISCOVER THE HEALTHY BENEFITS OF NUTRITIONAL CLEANSING

BSAFE

A powerhouse of potent natural ingredients formulated to help support the body's natural ability to remove toxins and other chemical impurities from internal organs and tissue.

BSAFE is available online in 100ct and 40ct bottles

Produced by Nutrisail LLC Fort Worth, TX 76182
