Live Life to the max

The most advanced multivitamin on the planet

From the top of your head to your feet and toes, from vibrant skin to healthy bones, we simply cannot survive without specific nutrients that the body does not produce on its own. This elite group of vital compounds are known as the *essential vitamins*. Meet B-MAX, the most advanced multivitamin on the planet.

Each capsule of B-MAX delivers a daily wave of essential vitamins your body needs to grow, heal and survive. Besides vitamins A, B, C, D, E and K, B-MAX also delivers organic carotenoids, astaxanthin and silica extract from wild bamboo. Add this powerhouse of essential nutrition to your daily arsenal and take your health to the MAX!

Vitamin A

Vitamin A is an important vitamin for healthy vision, immune system function, and cell growth. Vitamin A is essential to some functions performed by Vitamin D, K2, zinc and magnesium.

Vitamin C

Vitamin C, a very powerful antioxidant is so beneficial to our body in so many ways, it could take up an entire book...and it has. From prevention of illness and disease to recovery and everything in between, this "wonder-vitamin" is our best friend during flu and cold season.

Vitamin K

Vitamin K, specifically K2, is crucial to bone restoration and cardiovascular health and enhances the body's ability to utilize energy during exercise. K2 also increases testosterone in men and decreases androgen in women.

Vitamin B

Twenty percent of Americans over the age of 50 are deficient in Vitamin B12. Aside from being essential for cognition and brain health maintenance, Vitamin B12 can help you achieve peak health.

Vitamin D

Optimizing your vitamin D levels is one of the absolute best flu-prevention and optimal health strategies available. Vitamin D is also crucial to bone formation, immune function and maintenance functions.

Vitamin E

Vitamin E is a powerful antioxidant that helps prevent the buildup of cholesterol on artery walls. While synthetic Vitamin E in supplements and multivitamins can be harmful, B-MAX contains natural tocopherols extracted from non-gmo sunflowers.

max purity
potency
quality

Nutrisail will *never compromise* when it comes to the quality of our ingredients. In an industry where most supplement makers only care about the bottom line, you'll find less expensive multivitamins. You'll also find these cheaper alternatives often packed full of preservatives, fillers, and far less effective (and even dangerous) ingredients. Your body is a machine meant to run on premium fuel and essential vitamins are its most important fuel. Power your body with B-MAX and give your body the fuel it deserves.

max brain health

The power of **silica** vs toxic aluminum

Recent decades have shown a dramatic increase in neurological diseases linked to aluminum toxicity, including Alzheimers, Autism, and Dementia. The stats aren't as shocking when you take into account the vast industrial reach of aluminum in our modern environment. Prevalent in cookware, drinkware, cosmetics, toiletries, sunscreen and OTC medications, Aluminum is now suspected to be the more dangerous preservative over mercury in vaccines. Even if you are able to avoid aluminum from everyday items and modern medicine, you have no choice but to breathe aluminum particulates

from ubiquitous chemtrails. What makes aluminum so dangerous is that it passes freely through the blood-brain barrier and accumulates in our gray matter, leaving us susceptible to neurological dysfunction and disease.

B-MAX contains silica extracted from organic bamboo. While silica plays a role in nearly every major system of the body, B-MAX contains this amazing mineral for its rare, proven ability to penetrate the blood-brain barrier and aid the removal of toxic aluminum particulates from the brain and other vital areas of the body.
